DETAILED ACTION

This is the First Office Action in response to the above identified patent application filed September 15, 2006.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 4, 6, 9, and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. Claim 4 is not fully understood because it fails to further define the device as defined in claim 3. Claims 3 and 4 appear to be identical.

b. Claim 6 is not fully understood because it fails to further define the device as defined in claim 5.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3656

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 5, 6, 8, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Mohsin (USP 4,457,566).

Mohsin illustrates in Figure 7 a sliding surface provided on a movable slide, which is guided on the slide guiding surface for movement thereon, and slidably movable on the slide guiding surface; an oil groove (32) with a first supply hole (46) for supplying lubrication oil to a contact surface area between the sliding surface and the slide guiding surface; an oil pocket (33) formed independently of the oil groove for retaining the lubrication oil supplied to the contact surface area between the sliding surface and the slide guiding surface; and air discharge means (48) for discharging air from the oil pocket.

Allowable Subject Matter

6. Claims 3 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claim 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the bearing device of USP '799 and USP '378.
